monodev.eth

Full-stack operator building across security, AI, search, and digital infrastructure. 10 shipped products across DeFi, security, and trading infrastructure, from the first DeFi suite on Algorand to a nine-figure on-chain credit desk.

EXPERIENCE

2025 – now	Co-founder SigIntZero Smart-contract audit and security firm. Search, AI, and digital infrastructure across the brand and products.
2020 – now	Co-Founder / Software Engineer TrueOrigin Labs Venture studio behind IMF, Flow, Aetos, and more. Product and systems work across crypto, fintech, and applied AI.
2022 – now	Front-End, Design, Integration & QA Book Club Founding-team member. APAC crypto venture community, runs on Aetos.
2020 – 2022	Tech Co-Founder / Lead Frontend Engineer Yieldly The first DeFi suite on Algorand. Led front-end and product engineering through launch.
2020 – 2021	Full Stack Engineer MANTRA Web3 product engineering in the TrueOrigin external team.
2019 – 2021	Co-Founder TrueOrigin Onchain product authenticity and supply-chain provenance. The studio's namesake.

SELECTED WORK

2025 – now	IMF TrueOrigin Labs · front-end build Front end for a credit desk that peaked near \$260M TVL, followed by its V4 launchpad. Next.js · TypeScript · Ethereum · ENS · Morpho · app.imf.bz
2025 – now	StockRip TrueOrigin Labs · product & front-end Product and front end for a live tokenized-stock draw protocol with 76.5K rips and \$4.5M in pool volume. Next.js · TypeScript · viem · Robinhood Chain · Uniswap v4 · ERC-6551 · stockrip.com

2025 – now	SigIntZero SigIntZero · Co-founder Co-founded a security firm spanning AI scans, senior audits and runtime monitoring, backed by a Superteam Australia grant. AI · Security · Next.js · Search · sigintzero.com
2024 – 2025	Shuriken TrueOrigin Labs · core development Built the Rust simulation engine that checks honeypots and price impact before capital reaches the chain. Rust · EVM · Ethereum · ERC-20 · Simulation · shuriken.trade
2024 – 2025	Flow TrueOrigin Labs · trading front-end Built the trading front end for same-block copytrading on Solana and Ethereum. Next.js · TypeScript · Solana · Ethereum
2022 – 2023	Aetos TrueOrigin Labs · front-end + design + integration + QA Built the venture-DAO interface behind Book Club, an APAC community with more than 500 members. React · TypeScript · Solidity · The Graph · EVM · aetos.vc
2020 – 2022	Yieldly Tech co-founder · lead frontend Led front end and product from zero to mainnet for Algorand's first DeFi suite. React · TypeScript · Algorand · TEAL
